

# Ideal Mobile Cloud for ISP & Cellular Service Provider to Ride the Smart Home, Business, Community Wave

**TurnKey SaaS Mobile-cloud  
for Quicker Time to Market**

**Data, analytics, Mobile Push,  
Loyalty and Insights**

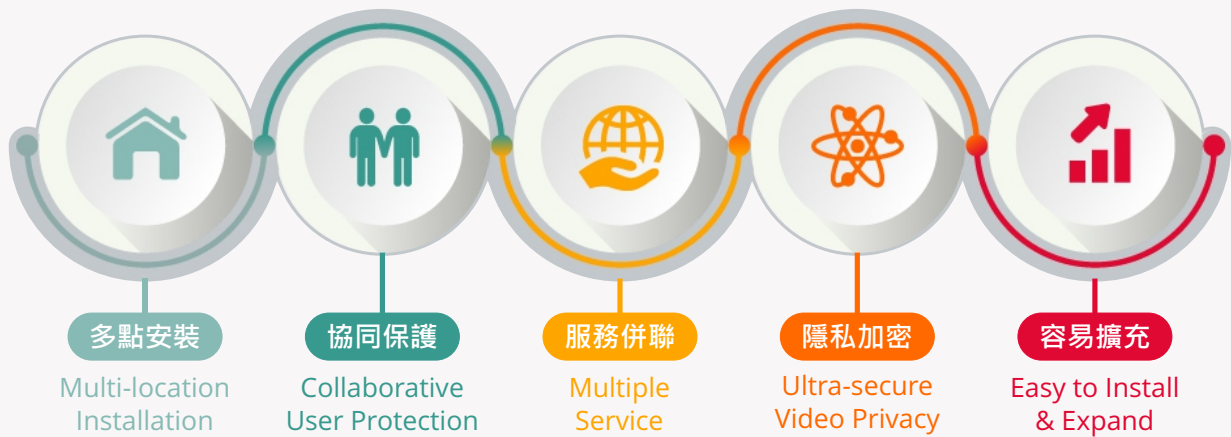

**In-a-box Systems  
Auto-configurable at Activation**

**Connected Value, Service,  
and Dependency**

Asia Pacific Telecom (APT) private labels Miotta Smart Connect mobile-cloud to deliver a turnkey smart home framework for smart home, smart business, and smart community services. Miotta provides APT with wireless connected mobile-cloud data acquisition, communications, 20+ embedded video, security, safety, care/wellness protections, automation, energy control devices in one app.

The APT Home Guardian is the company's first Connected Premises offering which uses one single app for the consumers to manage multiple devices, functional services, authorized users, and locations. The system also works with different ecosystem partners and supports open API. A cloud-based server stores all the event based activities and responses to user-defined management rules. The advanced "one-touch-to-responder" features video-verified collaborative protection with family members, emergency contacts, and optional to call-center to call the local first responder for prioritized response and utmost peace of mind service.
