Miotta can now utilize a smartphone to provide a mobile, video-verified monitoring solution accessible anywhere in the world. Using the full array of smartphone sensors and camera, the installed SIoT-Link app works in tandem with Miotta’s WWalarm application to allow users to monitor and provide video verification of events. Cargo Trucks, RVs, and yachts can now be monitored through a user’s smartphone application and an installed S-IoT system.

**1. Detect**
Motion/impact is detected

**2. Record**
Event Recording

**3. React**
Direct Notification

**Requirement**
The smartphone with S-IoT installed needs to have 3G/4G connectivity in order to work best in a mobilized environment, users needs to leave the phone in the mobilized properties.
